

# QOOL-Vic

*Addressing the needs of health service MDM management and providing the foundation for patient centered care*

**QOOL-Vic is the Department of Health's state-wide MDM software solution for public health services. Supporting patient sharing between regional and metropolitan cancer centres**

## Benefits of QOOL-Vic

- Secure and easy to use web based application
- Provided by DH at no charge
- Efficient pre and post-meeting information collection and distribution.
- Facilitates real time MDM data audit via the QOOL-Dash which monitors MDT activity and data quality in real time
- Facilitates better informed MDMs for improved decision making
- User customisable configuration with easy interface
- Data can be downloaded in a reportable manner
- Takes care of reporting MDCC activity to DH
- Has a direct feed from E-Path, which captures approx. 97% of all cancer pathology notifications

Queensland Oncology On-Line for Victoria

*"Supports the coordination & management of cancer multi-disciplinary team meetings"*

QOOL-Vic is a web-based system supporting cancer multidisciplinary teams by facilitating meeting preparation, communication, and documentation of essential clinical information such as diagnosis, cancer stage, co-morbidities recommended treatment plans.

QOOL-Vic provides a centralised platform of patient data for multiple users, accessible anywhere, anytime.

"QOOL-Vic allows users to be able to capture important clinical information about patients which can be used not just for MDT presentation, but also important for audits/clinical research"
