

How to safely clean your laptop and tablet

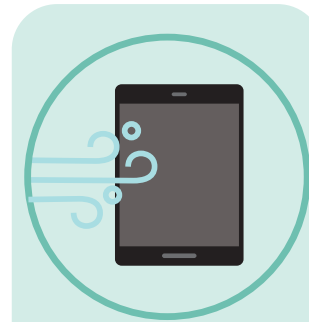

Perform hand hygiene **BEFORE** and **AFTER** you clean your laptop or tablet

Clean your laptop or tablet with a 70% isopropyl alcohol wipe
Do not use bleach

Perform hand hygiene **AFTER** cleaning

Air dry before using again
Remove dry wipe marks with a lint-free cloth

Clean and disinfect your laptop or tablet (including the charger if used)

- at the end of each shift
- any time it becomes soiled
- before returning it to its carry case

Laptops and tablets are highly touched and high-risk surfaces, which can become contaminated with coronavirus (COVID-19).
