

How to safely clean your mobile phone

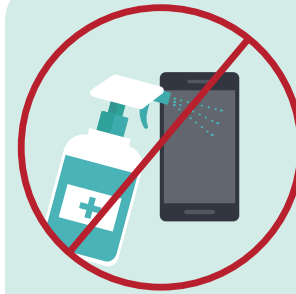

Perform hand hygiene **BEFORE** and **AFTER** you clean your mobile phone

Spray 70% isopropyl alcohol solution onto a clean cloth or paper towel

Wipe the phone with the cloth or paper towel
Or use a 70% isopropyl alcohol wipe

Do not spray cleaner directly on the phone
Do not use bleach

Air dry before using the phone again

Mobile phones should be kept in a cover or plastic bag that can be wiped over or discarded when you finish work

Mobile phones are highly touched and high-risk surfaces, which can become contaminated with coronavirus (COVID-19).

Mobile phones should not be used in clinical areas unless required for work purposes.

Avoid sharing mobile phones, headphones or ear pods. If they must be shared, clean and disinfect before and after use.
